1 Installation

VMS consists of two parts, VMS VMS server and client, you can choose to install VMS VMS server and client installed on the same computer, can also be installed separately on different local computer, select the default full installation.

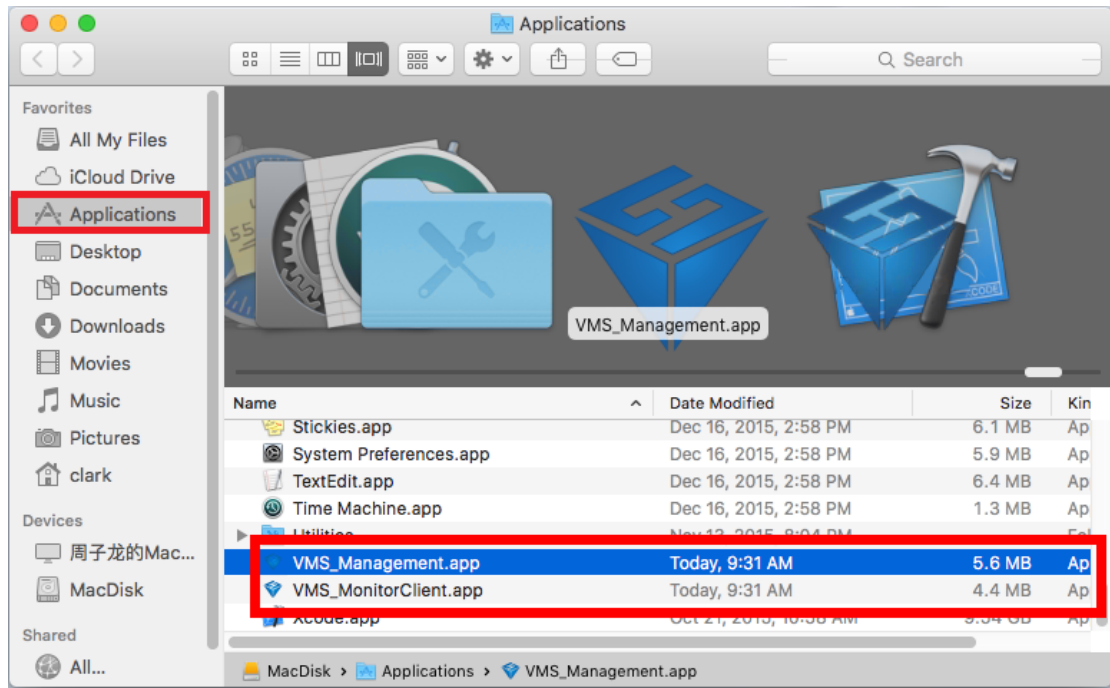

2 VMS usage and operating instructions

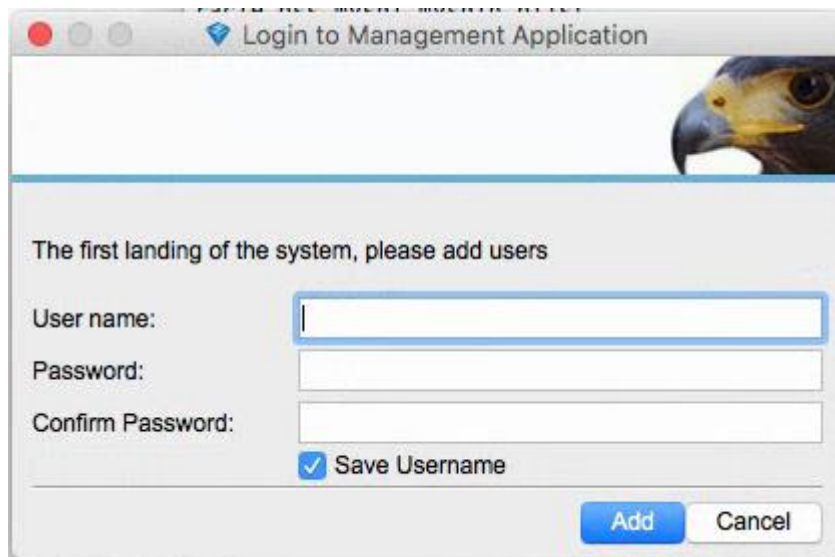

2.1 server and operating instructions

2.1.1 Login

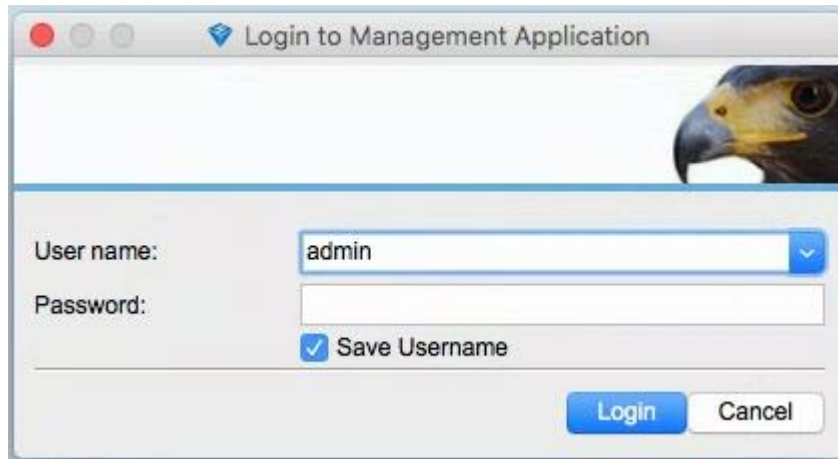

Double click this logo on your Applications

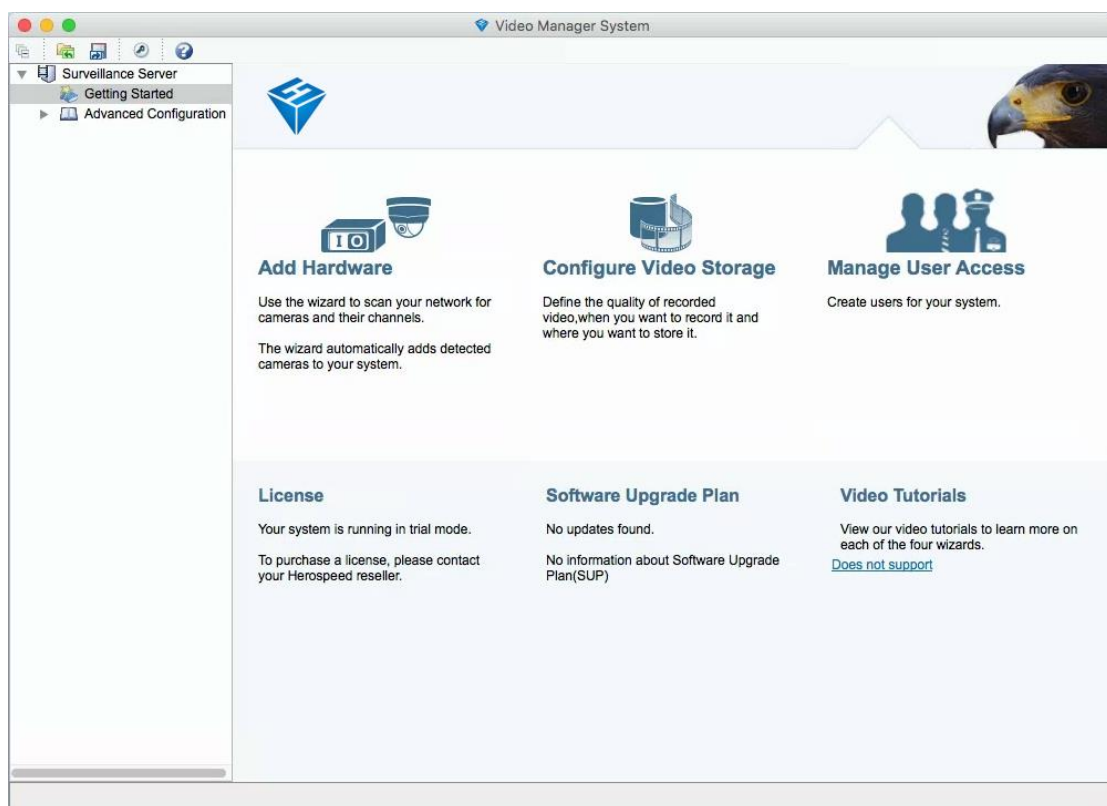

start the server management program, start interface as the first use of VMS Management program, you need to create a superuser

Use super-user or administrator user login VMS Management

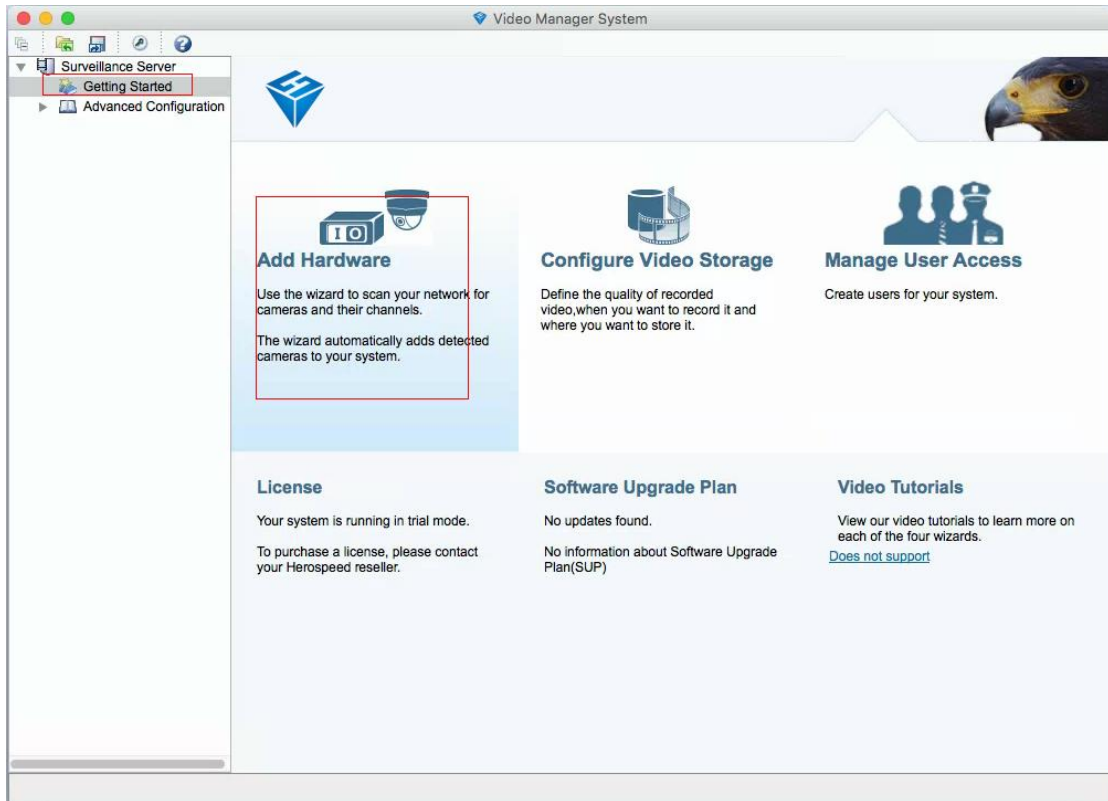

Successful landing into the management end of the main VMS Management Interface

2.1.2 Adding a hardware device

Click the entry, click Add Hardware

Pop-up dialog box to add add hardware, hardware scans can scan directly inside the LAN hardware device, you can also scan the specified network hardware; manually add the hardware is added directly to know the address or the serial number of hardware devices.

How do you want to add new hardware?

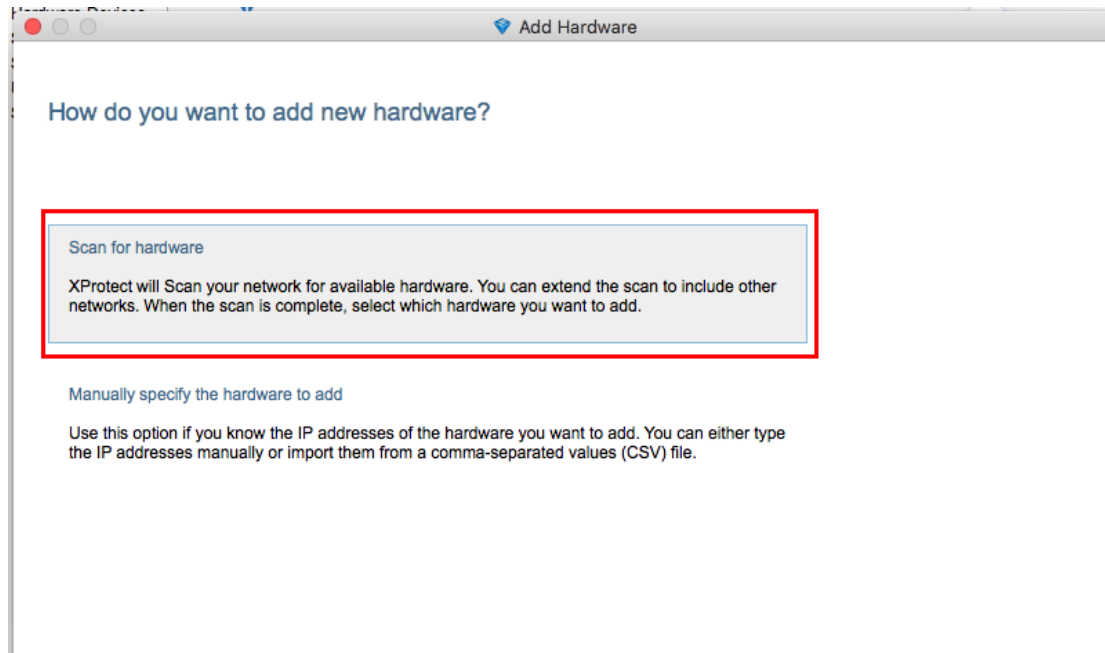

Scan for hardware

XProtect will Scan your network for available hardware. You can extend the scan to include other networks. When the scan is complete, select which hardware you want to add.

Manually specify the hardware to add

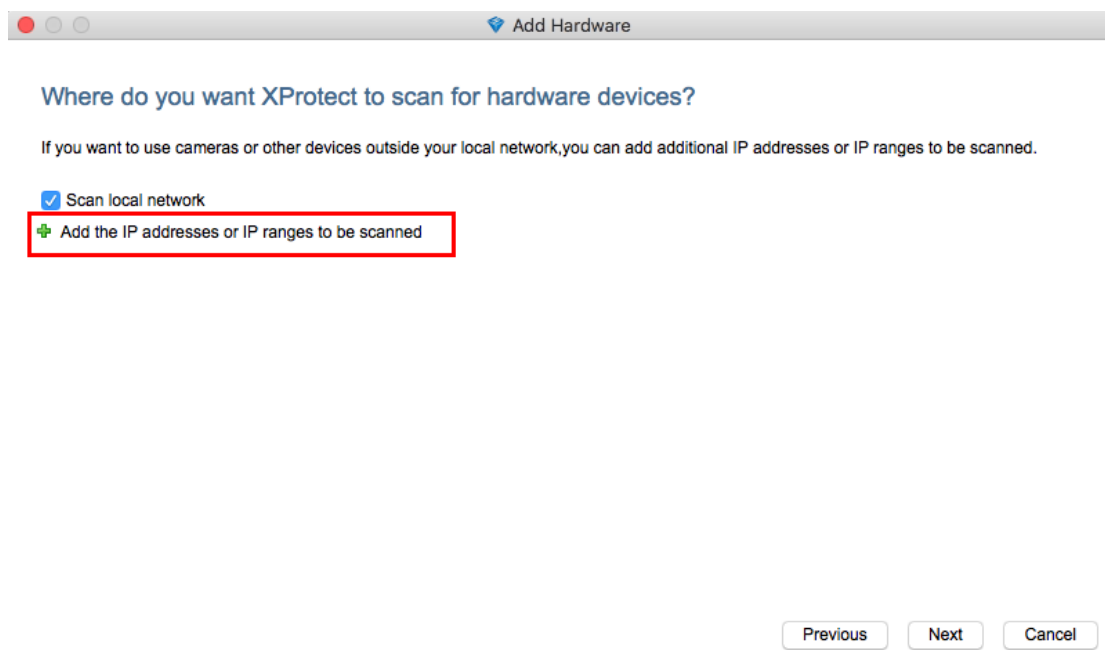

Use this option if you know the IP addresses of the hardware you want to add. You can either type the IP addresses manually or import them from a comma-separated values (CSV) file.

2.1.2.1 Adding scanning equipment

2.1.2.1.1 specified IP range scanning hardware

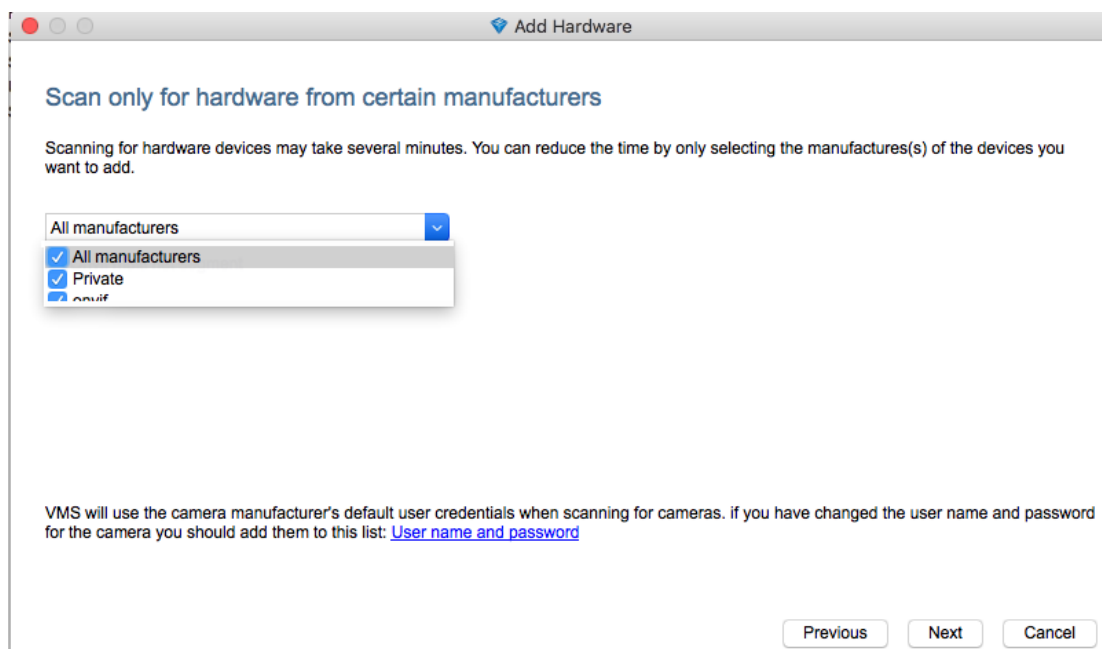

IP range can be set to filter search equipment, if you do not specify IP range can click Next to skip.

2.1.2.1.2 specify scanning hardware manufacturers

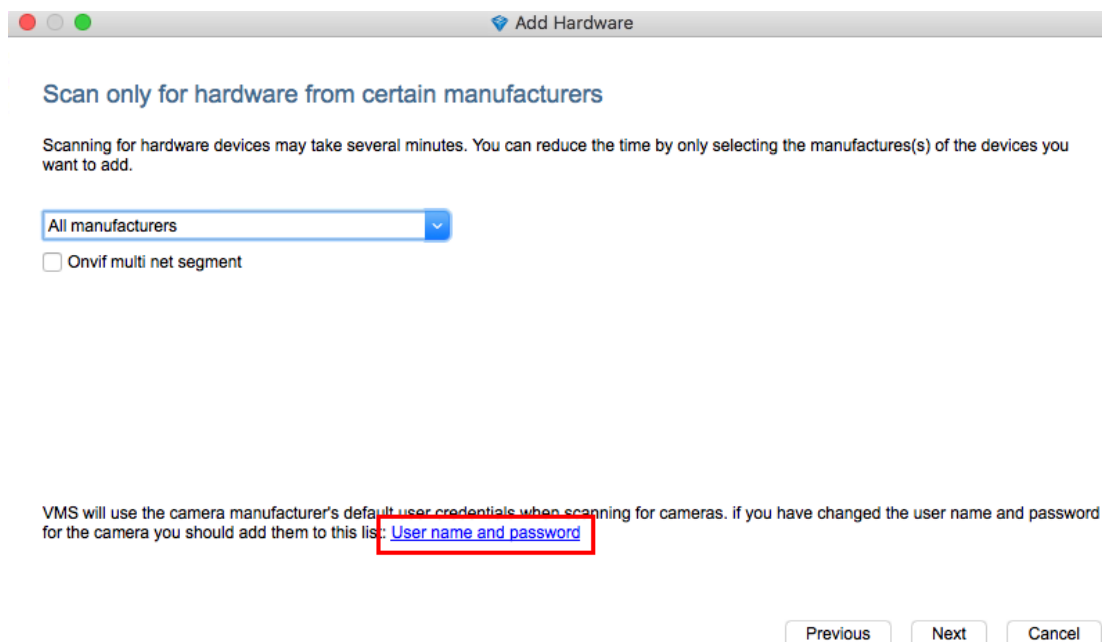

Can be set to search for equipment manufacturers, if you do not specify manufacturers can click

Next to skip the default search All manufacturers

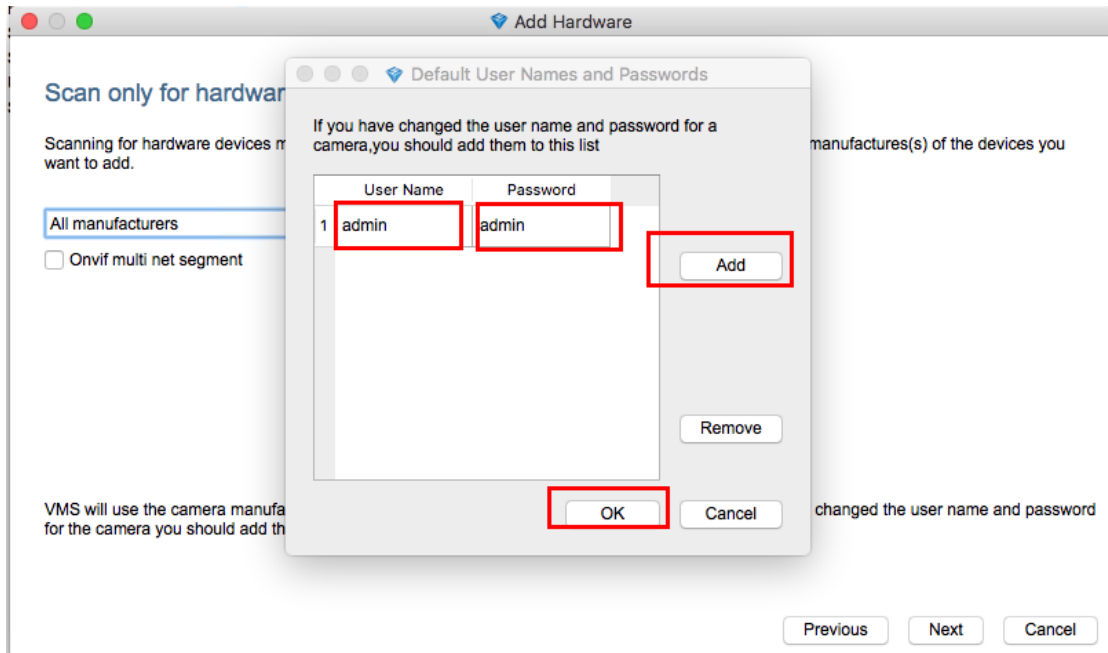

2.1.2.1.3 Configuring automatic verification

Add the default user name and password, and automatically verify scanned hardware devices (no need to configure automatic verification directly to the next step)

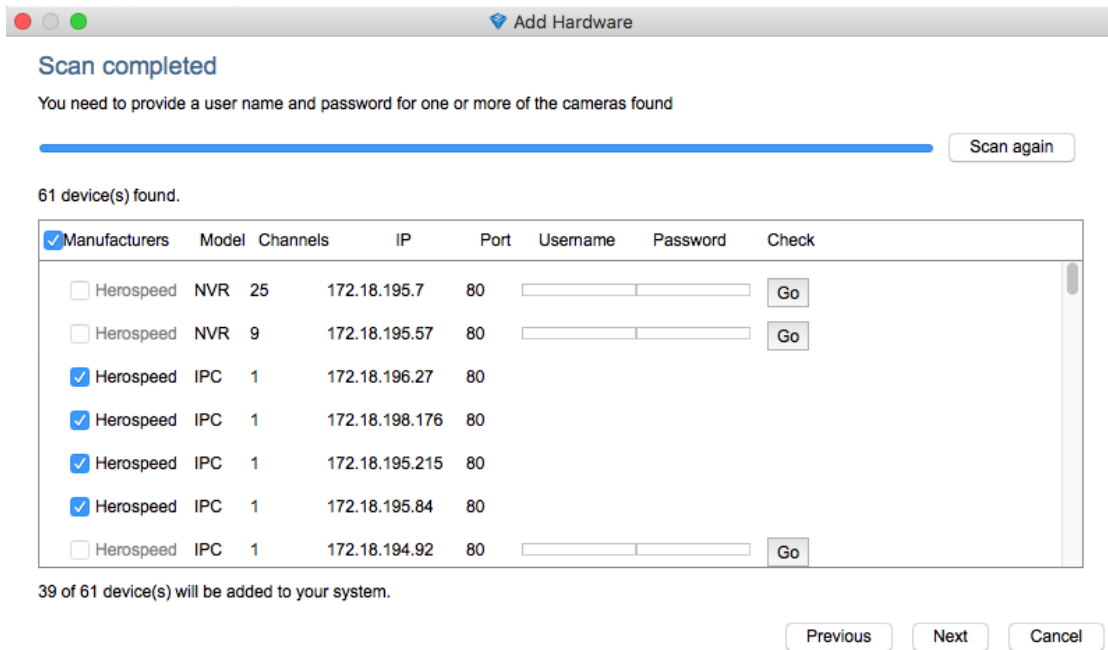

Pop-up dialog box to add a user name and password

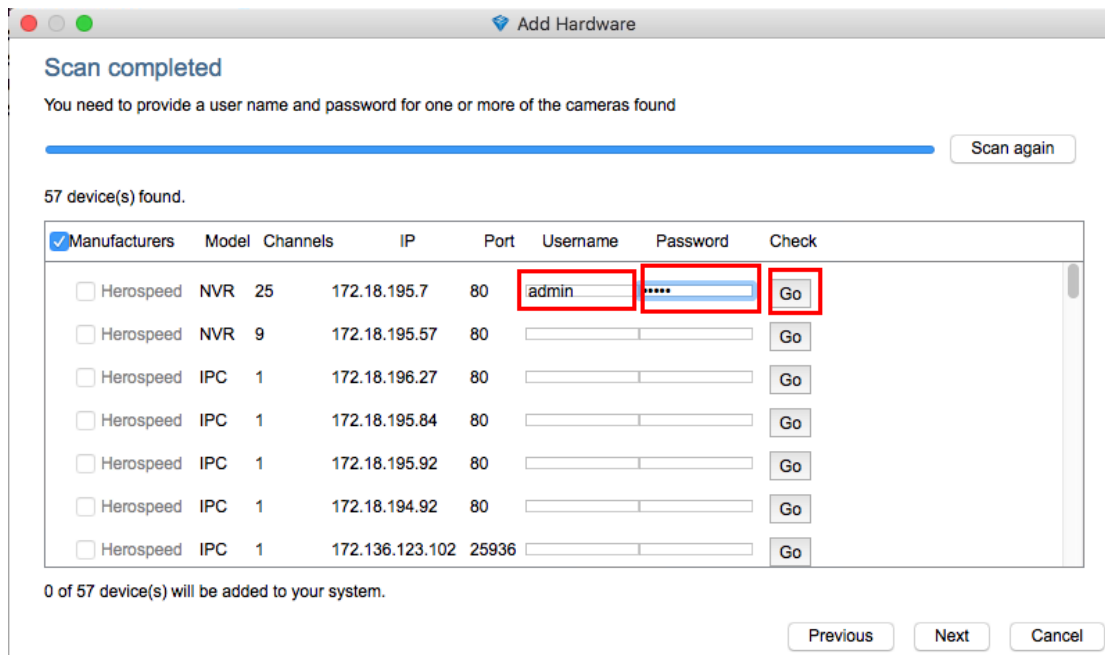

2.1.2.1.4 Start Depending on how the search appliance

Click Next.

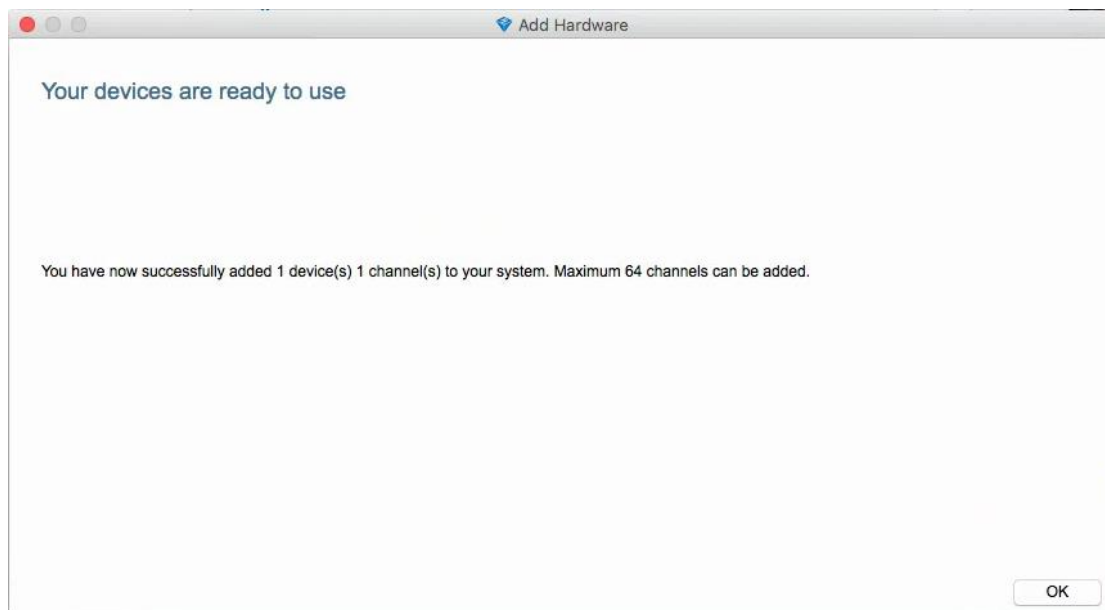

2.1.2.1.5 Manual Verification hardware

Hardware manually enter your username and password click Start

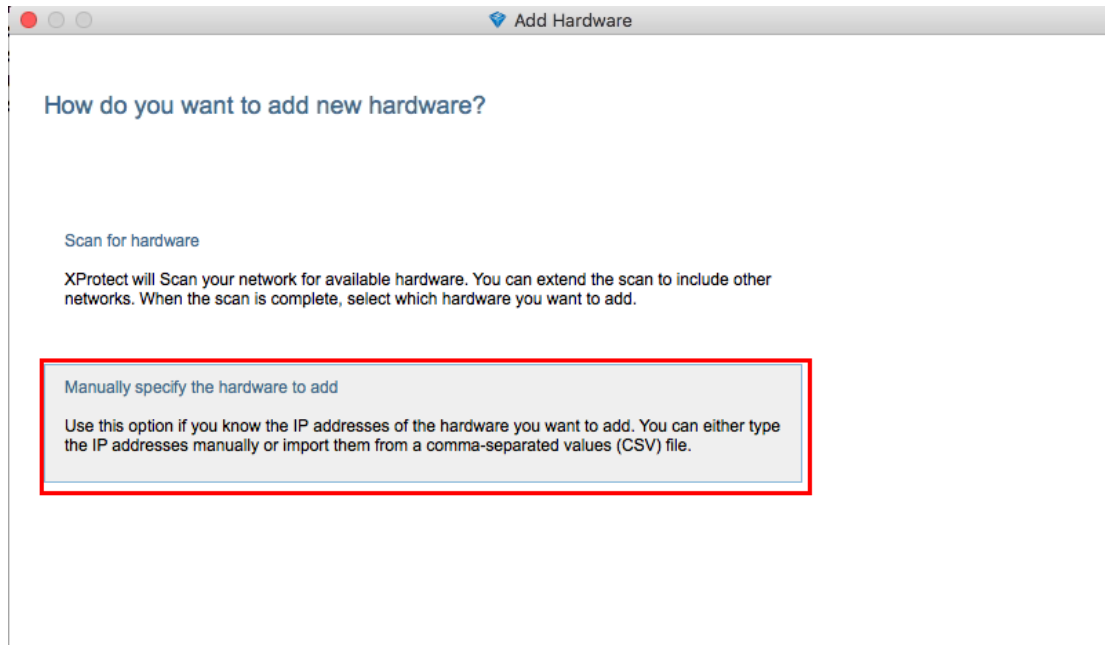

2.1.2.1.6 Completing the Add Hardware

Select the desired device, then click Next to complete the search for new ways of equipment, software can add up to 64 channels

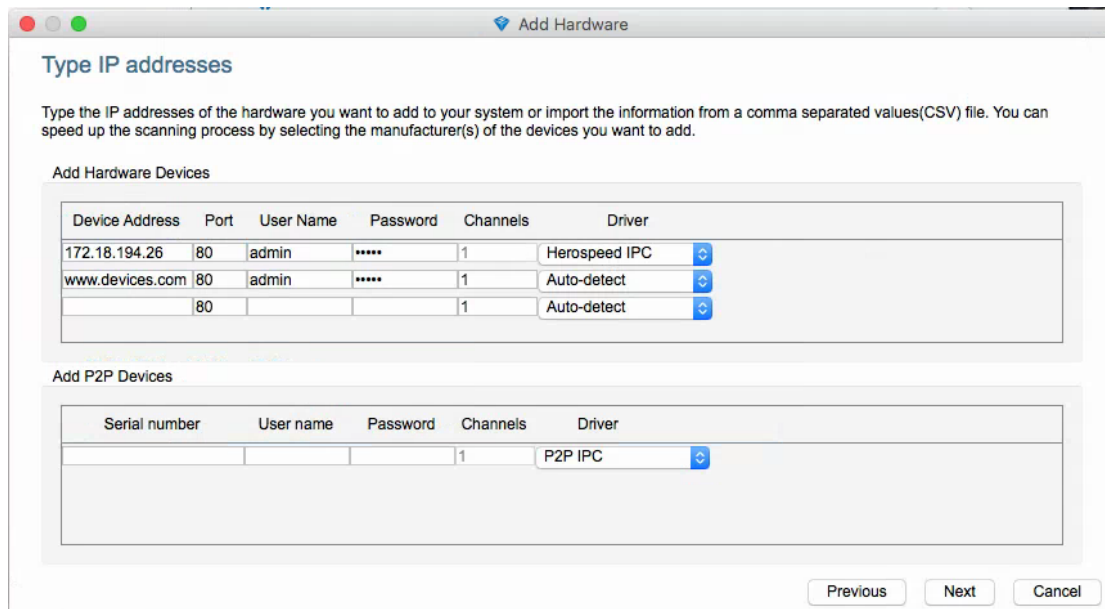

2.1.2.2 Manually Add Device

2.1.2.2.1 IP address is added hardware

Enter the IP or domain name, port number, user name, password, and the number of channels to choose the type of new equipment Driver

2.1.2.2.2 Adding hardware serial number

Input Devices SN code to add P2P device

Add Hardware

Type IP addresses

Type the IP addresses of the hardware you want to add to your system or import the information from a comma separated values(CSV) file. You can speed up the scanning process by selecting the manufacturer(s) of the devices you want to add.

Add Hardware Devices

Device Address	Port	User Name	Password	Channels	Driver
	80			1	Auto-detect

Add P2P Devices

Serial number	User name	Password	Channels	Driver
11111111111111	admin	*****	1	P2P IPC
			1	P2P IPC

Previous Next Cancel

Completed manually add devices, software can add up to 64 channels.

Add Hardware

Your devices are ready to use

You have now successfully added 1 device(s) 1 channel(s) to your system. Maximum 64 channels can be added.

OK

2.1.2.3 edit device properties

As shown below, click on the "1", double-click the "2"

Enable	Camera
<input checked="" type="checkbox"/>	Camera 1

OK Cancel

2.1.2.3.1 modify the hardware device name

2.1.2.3.2 modify the hardware device port number, user name and password

The screenshot shows a window titled "Hardware Properties" with a sidebar on the left containing two tabs: "Name and Video Channels" and "Network, Device Type and License". The "Network, Device Type and License" tab is selected and highlighted with a red border. The main area of the window is divided into two sections: "Network" and "Device type".

Network section:

- Address: 172.18.197.85
- HTTP port: 80 (highlighted with a blue border) Use default HTTP port
- RTSP port: 80 Use default RTSP port
- User name: admin
- Password:

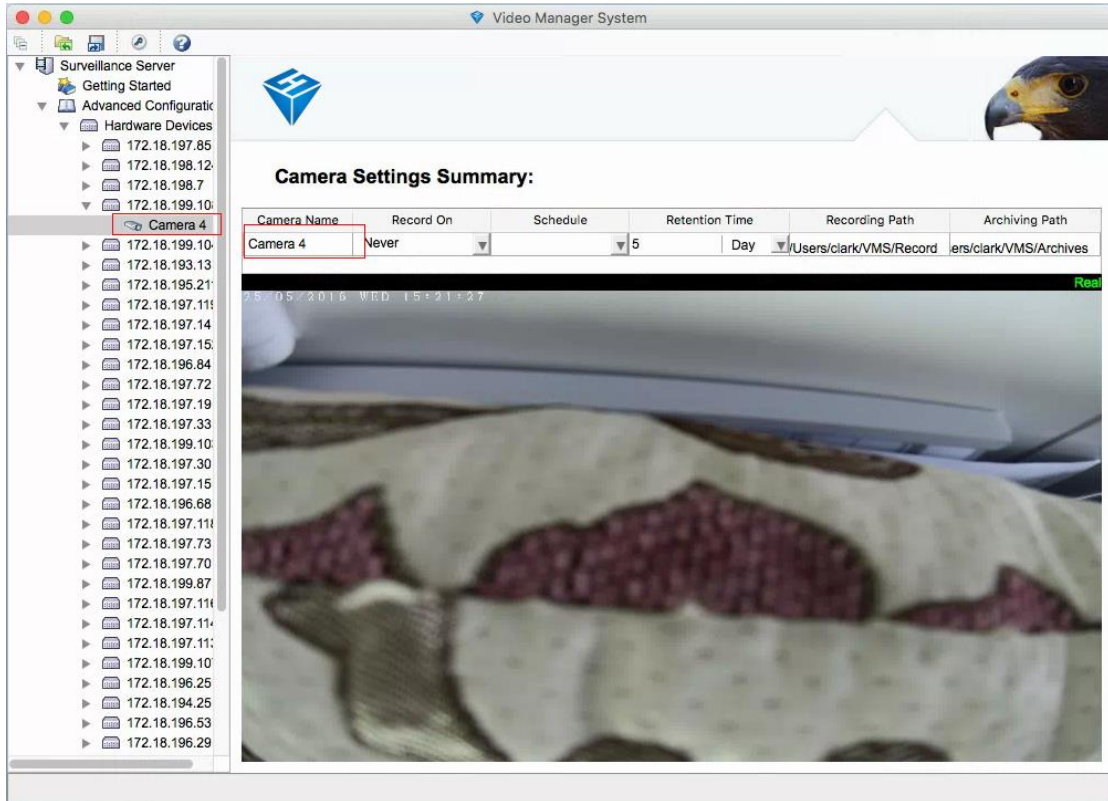

Device type section:

- Hardware type: Herospeed IPC
- Serial number (Mac address): 00:01:02:B9:6C:4C
- License information: Trial

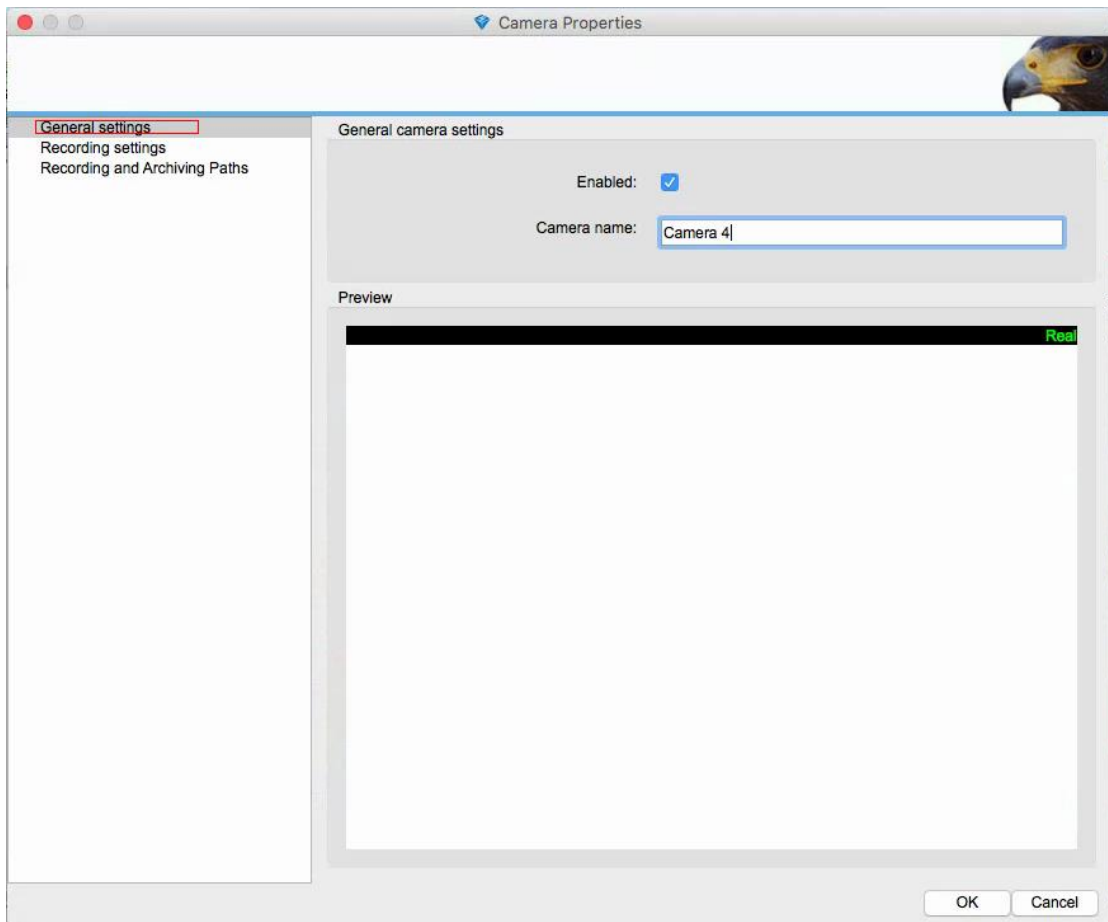

At the bottom right of the dialog box are "OK" and "Cancel" buttons.

2.1.2.3.3 Modify the channel name

As shown below, click on the "1", double-click the "2".

Open the Properties dialog box to modify the camera

2.1.3 Storage Configuration

Displays storage configuration information for all devices

The screenshot shows the 'Video Manager System' interface. On the left, a navigation tree includes 'Surveillance Server', 'Getting Started', 'Advanced Configuration', 'Hardware Devices', 'Storage Information' (highlighted), 'Server Access', 'Users', and 'Services'. The main content area is titled 'Camera Summary:' and contains a table with the following data:

Camera Name	Record On	Schedule	Retention Time	Recording Path	Archiving Path
Camera 18	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 14	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 26	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 17	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 15	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 23	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 31	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 13	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 8	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 30	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 25	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 20	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives
Camera 11	Never		5 Day	/Users/clark/VMS/Rec...	/Users/clark/VMS/Archives

Below the table is the 'Storage Usage Summary:' section, which includes a table and a pie chart:

Drive	Path	Drive Size	Other Data	Free Space
MacDisk	/	85 GB	71 GB	14 GB

The pie chart shows a legend with 'Free space' (green) and 'Other space' (red). The 'Archiving Times' section shows a dropdown menu with '15:10:07' and 'Add' and 'Delete' buttons.

At the bottom of the interface, a message states: 'There are 0 channels has been configured to store information'.

Channel storage configuration editor, double-click to the right of the list box into the recording and storage properties, you can only give one camera configuration can also use templates to configure multiple cameras, (using the template configuration see 2.1.3.3).
